## About

Experienced and results-driven Assistant General Manager with a strong background in software engineering and leadership. With over 4 years at DevsNest OPC, I transitioned from Software Engineer to Lead Software Engineer, and now to Assistant General Manager, consistently driving innovation, leading high-performing teams, and delivering impactful solutions. Expertise in software development, team management, and strategic planning, with a proven track record of contributing to organizational growth and success. Passionate about leveraging technology to solve complex challenges and elevate business performance.

## Work Experiences

### DevsNest OPC

Assistant General Manager	Jan 2025 – Present
Lead Software Engineer	Jun 2022 – Dec 2024
Software Engineer	Aug 2021 – July 2022

**Work Platform:** Shopify

**Technologies:** PHP 8.1\*, Laravel 8, Shopify REST API, Shopify GraphQL, MySQL, Vanilla Javascript, AWS EC2, Sendgrid, Twilio, Recharge, Stripe, Github, Slack, Trello

### Role & Responsibilities

- Expertise in designing and implementing advanced software architectures for mobile and web applications, with a focus on scalability, performance, and security.
- Developed and deployed over five custom Shopify apps, leveraging cutting-edge technologies including Laravel, ReactJS, Shopify GraphQL, and REST Admin APIs.
- Skilled in leading cross-functional development teams, ensuring efficient project execution, and driving continuous improvement in code quality and feature development.

## Role & Responsibilities

- Proven ability to lead code reviews and provide technical guidance to optimize app performance, ensuring the highest standards of software quality.
- Strong problem-solving skills, particularly in addressing and resolving critical challenges for the company's flagship product, delivering unique solutions that have a significant impact on business outcomes.
- Adept at collaborating with stakeholders and managing project timelines, ensuring that complex technical objectives align with business goals and customer needs.

## BottomLine Tech.

Ecommerce Contract

May 2021 – Aug 2021

I have developed this B2B Multivendor Consumer Solution project for a startup company. Using this app many companies can maintain their distributor chain and shopkeepers can easily purchase their goods from distributors over an app. I developed web and android solutions both. I connected PHP APIs with the Android app via Volley library.

**Technologies:** PHP, MySQL, Firebase Auth, Google Auth, HTML, CSS, JS, AJAX, Github, Android App (JAVA)

## Digital IT Institute

Jr. PHP Developer

Jan 2021 – May 2021

- Given training to two interns and managed the development team single-handedly as a project head.
- Developed several local e-commerce projects.

**Technologies:** PHP, MySQL, HTML, CSS, JS, AJAX

## Frelance Jobs

Android Apps Development

Mar 2019 – Aug 2021

- Developed a few android apps for university students for extra pocket money.
- Used Firebase for authentication, MySQL for API, and followed MVVM architecture.
- Best Project: Automated Doctor's Appointment System which is an android app.

**Technologies:** Android Studio, Firebase, Google Auth, MySQL, PHP 7.4, Volley, Postman
