About

Worked as a PHP developer over the years. Currently, at my company, my task is to create and maintain Shopify apps for merchants in collaboration with the REST admin API and GraphQL of Shopify. My interest is growing toward an Advanced Database Engineering career.

Proficient Languages

- PHP (Raw + OOP)
- HTML, CSS, JAVASCRIPT, AJAX
- JAVA (Android)
- Frameworks: Laravel, React
- Shopify REST API
- GraphQL
- MySQL

Work Experiences

DevsNest   Aug 2021 – Present
Backend Developer

- Develop software architectures and create apps for Shopify merchants.
- Use PHP as the main language to perform GraphQL & REST Admin API operations.
- Work as a backend project lead with a balanced development team.

Digital IT Institute   Jan 2021 – May 2021
Jr. PHP Developer

- Given training to two interns and managed the development team single-handedly as a project head.
- Developed several local e-commerce projects.

Frelance Jobs   Mar 2019 – Aug 2021
Android Apps Development

- Developed a few android apps for university students for extra pocket money.
- Used Firebase for authentication, MySQL for API, and followed MVVM architecture.
- Best Project: Automated Doctor's Appointment System which is an android app.
